The Doctor Can See You Now

St Neots, Cambridgeshire, UK - 20 DECEMBER, 2006: The Thalidomide Trust, an U.K. registered Charity, requests the support of 3G Doctor to trial the 3G Doctor Care Solution with beneficiaries.

The Thalidomide Trust have committed to exclusively working with 3G Doctor on a 6 month trial to assess the clinical and social benefits that access to the health management services of 3G Doctor can provide to beneficiaries of the Trust.

It is with the authority of the Trust that 3G Doctor invites offers of financial and service support to meet the requirements of the organization and provision of this trial. Following the trial participating companies will be favourably considered as long term supportive partners for the ongoing care provision services funded by the Trust.

About the Thalidomide Trust

Established on the 10th of August 1973 the Trust has the aim of providing relief and assistance for those people born, in the United Kingdom, damaged as a result of their mothers having taken the drug Thalidomide (as manufactured by Distillers Biochemicals Limited) during their pregnancy. Currently they support 453 individuals, each in the main between 43 and 47 years of age who, for the most part, have two or four limbs missing.

Since 2001 the Trust has resourced a project aimed at finding the best ways of using new computer and communications technologies to help beneficiaries cope with everyday life and this has led to the integrated Health Information Service as published in the 2006 Long Range Plan.

About 3G Doctor Limited

3G Doctor is a registered Doctor led service that provides UK adults (aged 18+) with affordable, private round the clock 3G Video Call access to the advice of highly trained General Medical Council registered Primary Care Doctors. These carers are waiting to answer queries, diagnose medical problems and recommend treatments. The service is an important development in the mobile pervasive future of healthcare and has been created to help meet the evolving need for remote access to the regulated advice of qualified and registered Doctors.
