The Doctor Can See You Now

London, UK - 5 JUNE, 2006: 3G Doctor sets out its launch plans in a presentation to the Mobile Monday London Forum.

Sponsored and hosted by Sun Microsystems the June Mobile Monday London event also had presentations from Symbian (the worlds leading Smartphone OS company) and Consult Hyperion and demos from Bluetrail and Red Oxygen.

David Doherty, Business Development Director, laid out the Autumn launch plans for the new 3G Doctor service - a revolutionary mobile Video Medical Consulting service that uses a sophisticated medical questionnaire technology to remotely gather a complete history of present illness information directly from a patients mobile phone prior to the video session with an informed Doctor.

Following a brief look at the need and benefits of positive PR for 3G Video Calling to become adopted, a member of the audience was selected to demo a live 3G Doctor consult with 3G Doctor' Medical Director, Dr John Doherty.

Feedback was fantastic and members of the group commented on the appeal of a highly focused consult experience at an affordable cost and unmatched level of convenience.

About 3G Doctor Limited

3G Doctor is a registered Doctor led service that is launching in the UK to provide adults (aged 18+) with affordable, private round the clock 3G Video Call access to their medical information and the advice of highly trained General Medical Council registered Primary Care Doctors. These carers are waiting to answer queries, diagnose medical problems and recommend treatments. The service is an important development in the mobile pervasive future of healthcare and has been created to help meet the evolving need for remote access to the regulated advice of qualified and registered Doctors.
